

To Whom It May Concern:

XM Radio is one of the better parts of my day. I have a daily commute of over two hours (one-way) and normally spend my driving time listening to nothing on the radio. I have found that the new local traffic reports are informative and has aided me in avoiding 'sticky' traffic conditions to say the least. With all due respect, I urge the FCC to reject NAB's petition 04-160 and support XM's ability to provide the kind of radio programming I've come to enjoy, demand, and deserve.

Very truly your,
Charles Carbonaro
